#### Unit Material Handling Conveyor Solutions

#### SYSTEM PLAST™ SEALMASTER®

A Regal Brand

REGAL

# Our team of material handling specialists will provide superior support for your unique conveyor conversion needs

Re-build: Install new conveyor components onto existing framework

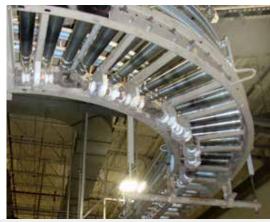

Completion: Run and confirm that new configuration meets expectations

### Are you experiencing these typical problems with your belt or roller conveyors?

- Belt tracking and adjustment issues
- Belt wear and replacement
- Complicated snub roller center drive assembly
- Costly maintenance required due to worn parts

- Wallowed hex hole side frames
- Safety issues with multiple moving components
- Excessive noise levels
- Dead zones and or broken roller drive components

## Let us show you the benefits of converting to a plastic modular belt or chain solution:

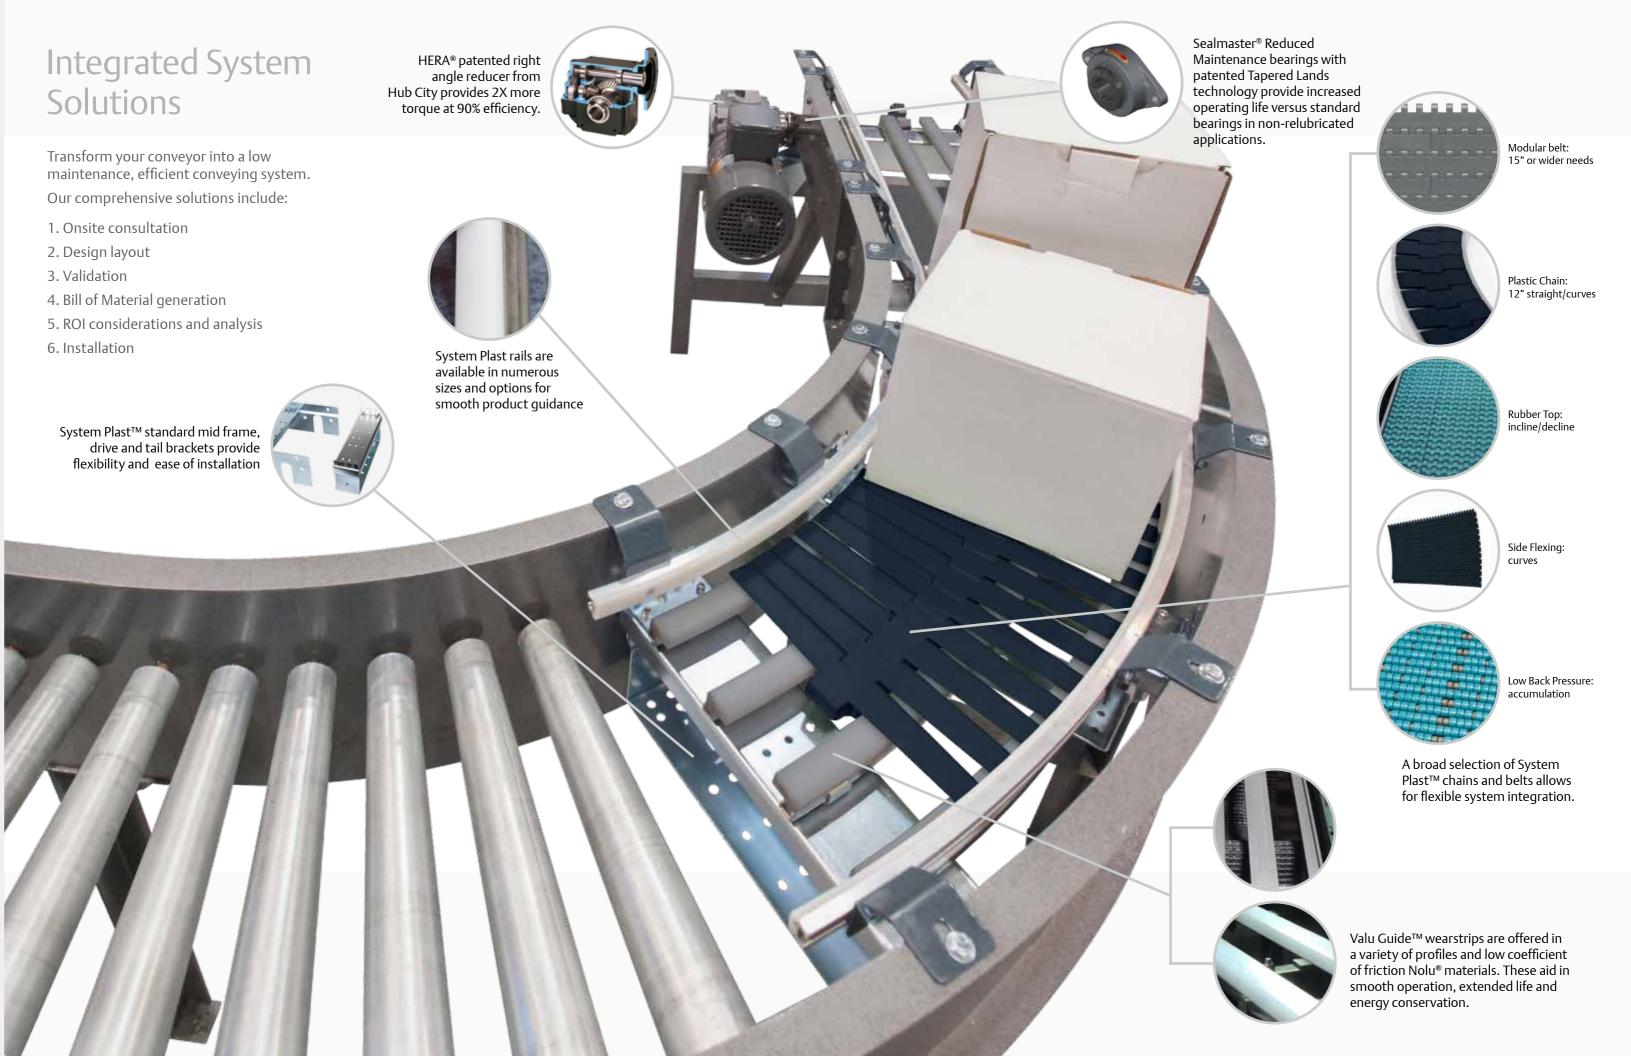

- Reduce maintenance and down time
- Leverage current system frame
- Decrease noise levels
- Decrease number of mechanical parts

- Increase line efficiency
- Reduce product or case damage
- Decrease energy consumption
- Potential drive reduction
